THE PAINT & PAINTING
PEOPLE OF
INDIA

— SINCE —
2008

OUR VISION

To become India's leading paint manufacturer and painting services company.

OUR MISSION

To deliver quality paint products and dependable services that meet customer needs. We remain committed to maintaining high standards across our products, processes, and services while caring for the environment.

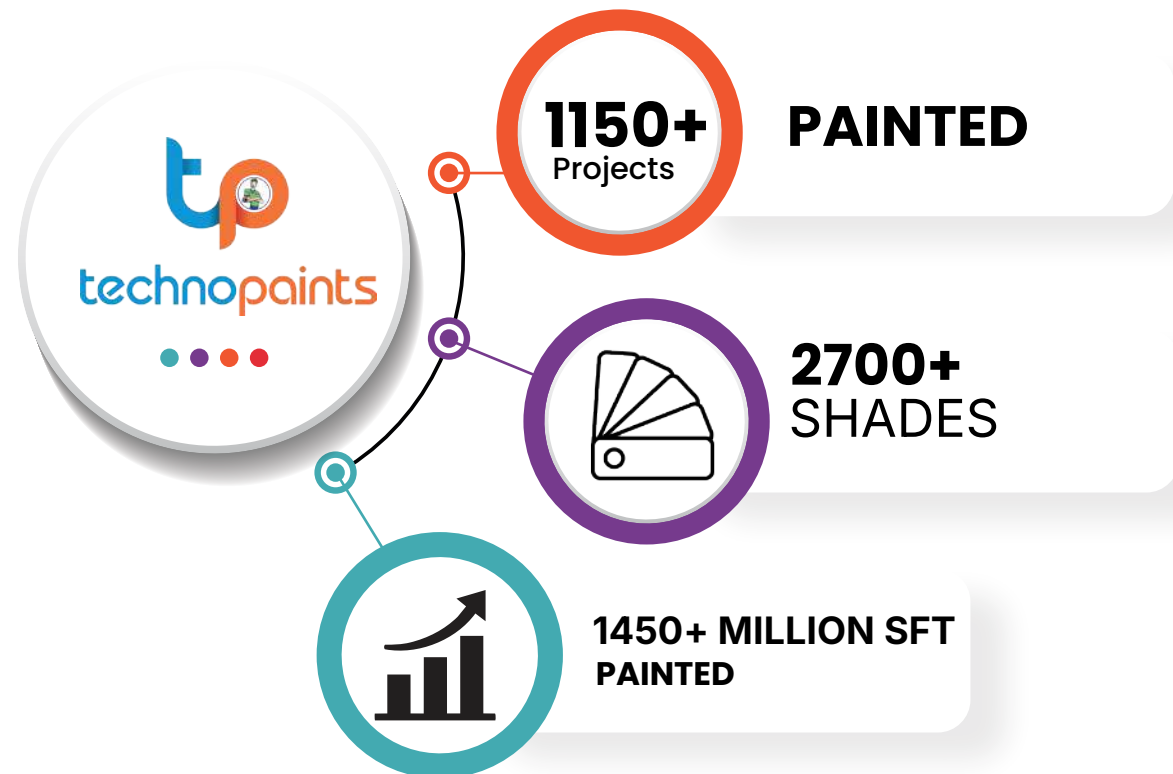

ABOUT US

Technopaints manufactures paints and provides professional painting services across residential, commercial, industrial, and hospitality sectors.

Our focus on product quality, customer satisfaction, reliable execution, and environmental responsibility has helped us build lasting trust across the Indian paint industry.

We offer more than 2,700+ paint shades through our colour banks, allowing us to meet a wide range of customer requirements. Our product portfolio also includes wood adhesives, tile primers, wood polishes, and waterproofing solutions.

For over 18 years, we have served the business-to-business segment with quality paints and professional application services. We have completed more than 1150+ projects across Andhra Pradesh, Telangana, and other parts of India.

INTERIOR EMULSIONS

LIVE *Lavish.*

Crafted for Beautiful Interiors.

LAVISH

Lavish Luxury Interior Emulsion combines high-quality design with practical benefits such as long-lasting durability and easy maintenance. Whether it's removing household stains or maintaining the luxurious appearance of the walls, it offers both aesthetic appeal and functional performance.

ENAMELS

SYNTHETIC ENAMEL HIGH GLOSS

Synthetic Enamel High Gloss delivers a refined, high-sheen finish that enhances the appearance of metal and wooden surfaces. Its superior formulation offers excellent coverage, rich colour depth and lasting protection, creating a smooth, lustrous finish that retains its premium look over time.

ULTRA GP SYNTHETIC ENAMEL

Ultra GP Synthetic Enamel is a premium coating designed to deliver a smooth, durable and elegant finish on metal and wooden surfaces. Its advanced formulation provides excellent coverage, rich colour and lasting protection, ensuring a refined appearance with dependable performance for both interior and exterior applications

ULTRA RED OXIDE METAL PRIMER

Red Oxide is intended for use on all bare metal surfaces, both interior and exterior. It is formulated with special micronized red oxide to help prevent corrosion. The surface must be clean, smooth, sound, dry, and free from wax, dust, and contaminants. Bare metal should be clean and free from rust; existing rust can be removed using Techno Rust Remover. One coat is usually sufficient, while a second coat may be applied if required. Sand lightly between coats if necessary. The drying and recoating time is 4–8 hours.

ZINC METAL PRIMER

Yellow Zinc Primer is a solvent-based protective coating for ferrous surfaces in mild to moderately corrosive environments. It forms a durable film that provides effective protection against corrosion. It is suitable for ferrous metal surfaces in both interior and exterior applications. Ensure the surface is free from dirt, dust, moisture, grease, wax, and other adhesion-inhibiting compounds. It can be applied by brush, roller, or spray. Allow 6–8 hours before applying the second coat. At 25°C, the surface dries in 1 hour and becomes tack-free in 3 hours. It forms a long-lasting film with excellent adhesion and higher coverage.

OIL BASED PRIMER

Oil Based Primer is a high-performance primer formulated to provide excellent adhesion and a smooth, uniform base for topcoats. It helps enhance surface durability, improves coverage and provides reliable protection for metal and wooden surfaces, ensuring a superior finish and longer-lasting paint performance.

TECHNO EPOXY PRIMER 1K

Techno Epoxy Primer 1K is a protective primer designed to provide a strong and uniform base for epoxy coating systems. It promotes good adhesion between the substrate and subsequent coats while helping create a smooth, durable surface. Suitable for metal and other properly prepared surfaces, it helps improve the overall performance and finish of the coating system.

TECHNO EPOXY PRIMER 2K

Techno 2-Pack Epoxy Primer is a two-component, high-performance primer designed to provide strong adhesion and a durable base for subsequent coating systems. It helps seal and protect the substrate while improving the bonding of the topcoat. Suitable for concrete, metal, and other properly prepared surfaces where a strong and long-lasting coating system is required.

PU ENAMEL 2K

Techno PU Enamel 2K is a two-component polyurethane enamel designed to deliver a smooth, premium finish for metal, wood and other suitable surfaces. It provides a hard and durable coating with excellent appearance and helps protect the surface from everyday wear. It is suitable for applications where both surface protection and an attractive finish are required.

WOOD FINISHES

ULTRA WOOD PRIMER

A high-quality single-pack, quick-drying undercoat based on modified alkyd, specially formulated for priming timber that is to be top-coated with various finishes such as polyurethane coatings. The primer offers high opacity, good film build-up, deep penetration, and excellent sealing properties. It is easy to sand and provides excellent adhesion for subsequent coats. It is recommended for softwoods, hardwoods, chipboard, and fibreboard, and is suitable for both interior and exterior woodwork. It can be applied by brush, roller, or spray, depending on the requirement and application skill.

PU LUXURY WOOD COAT

PU Luxury Wood Coat is an interior and exterior, quick-drying polyurethane-modified alkyd coating that dries to a hard, mar-resistant, and uniform satin finish. It provides an attractive satin/gloss appearance, quick drying, and good resistance to mar formation. The one-pack coating enhances the natural appearance of timber with an attractive soft sheen. Polyurethanes dry faster than conventional varnishes, helping reduce the time between coats. It provides a tough and long-wearing finish and is easy to use without limited pot life. It can be applied on furniture, doors, skirtings,

TECHNO 1 - PACK EPOXY FINISH

Techno 1-Pack Epoxy Finish is a single-component epoxy coating designed to provide a tough, durable, and attractive finish to properly prepared surfaces. It offers good resistance to wear, stains, and everyday exposure while creating a smooth, protective surface. Suitable for industrial, commercial, and utility areas where long-lasting surface protection and a clean finish are required.

TECHNO 2 - PACK EPOXY FINISH

Techno Epoxy Finish 2K is a two-component epoxy coating designed to provide a tough, smooth and durable finish. It offers good surface protection along with a clean, professional appearance, making it suitable for areas where resistance to wear and long-lasting finish are required. The 2K system provides a strong coating film when properly mixed and applied.

TECHNO 2 - PACK PU TOP COAT

Techno 2-Pack PU Top Coat is a two-component polyurethane coating designed to provide a tough, durable, and smooth protective finish. It offers excellent resistance to weathering, abrasion, chemicals, and everyday wear, making it suitable for industrial and commercial surfaces. The coating provides a long-lasting finish while enhancing the appearance and protection of the underlying surface.

DAMP GUARD

Interior & Exterior

Damp- Guard for interior and exterior fiber reinforced damp proofing liquid mebrane that can be applied to sound masonry by brush or roller. A non-toxic, non-hazardous and solvent free liquid damp proof treatment that can be painted on to walls for waterproofing and for providing strong barrier.

FLOOR PAINT

Interior & Exterior

Techno Paints Floor Paint is a durable coating designed for both interior and exterior floors. It provides a smooth, attractive finish while helping protect surfaces from regular wear, weather exposure, dust, and daily foot traffic. Ideal for residential, commercial, and outdoor spaces, it enhances the look of floors while delivering lasting surface protection.

Outdoor Pavements

Garage Floors

Basement Floors

TECHNO BOND

Techno Bond is a high-performance bonding solution designed to improve the adhesion of plaster to various building surfaces. It creates a strong bonding layer between the substrate and plaster, helping reduce peeling, debonding, and surface failures. Ideal for walls, ceilings, concrete surfaces, and other difficult-to-plaster areas, Techno Bond supports a strong and durable plaster finish.
